WELCOME MESSAGE

Dear All,

We cordially invite you to participate to the Euro Neurology and Neurosurgery Congress to be held in Paris on September 01-02, 2020.

A right choice of conference destination is an important aspect of any international conference. So Paris is a beautiful place where it will be possible to show your personal scientific work in an international neuroscience congress. In particular young investigators and students must be stimulated to present their contribution in neurological sciences.

The program will contain keynote sessions, oral and poster presentations and a student forum. Also, educational workshops and highlights of the day sessions will be available.

There will be six sessions with each four parallel topics on specific basic and clinical themes concerning different diseases of the nervous system and on specific investigation techniques.

There will also be a large opportunity to meet recognized experts in different fields of neurology and neurosurgery.

So we hope that many of you will be able to come during springtime in Paris and have not only a rewarding scientific congress but also a fascinating exploration of the city.

Jacques L De Reuck

Professor, INSERM U1171 Degenerative and Vascular Cognitive Disorders, Université de Lille 2, France.

WELCOME MESSAGE

Dear Colleagues,

The Euro Neurology 2020 in Paris will give you an update on the latest news in Neuroanaesthesia and Neurointensive Care. The fast growing field of Neurointensive Care is a fascinating part of Critical Care Medicine. Especially the management of ischemic stroke and intracerebral hemorrhages has achieved major breakthroughs in the last years. The same holds true for Neuromonitoring and Neuroanaesthesia. The program for the Paris Conference promises cutting-edge science and a brought overview on the field of Neurointensive care and Neuroanaesthesia. Beside that, the city of Paris in April is always worthwhile to visit. Looking forward meeting you at the Euro Neurology 2020.

Stefan Schwab

*Professor of Neurology, Director and Chair, Department of Neurology,
Friedrich-Alexander University Erlangen-Nuremberg, Germany*

PRESENTATION FORUM

KEYNOTE FORUM / MINI-PLenary SESSIONS

Presentations under Keynote Forum or Mini-Plenary Sessions includes abstracts with remarkable research value selected by the program committee. These significant speeches are delivered by globally recognized honorable speakers and it is open to all registrants.

DISTINGUISHED SPEAKERS FORUM (ORAL ABSTRACT SESSIONS)

In this forum, speakers and experts of the research field gets an opportunity to showcase their noble research work that involves comprehensive research findings. These formal oral presentations include a wide range of talks covering basic research to advanced research findings in accordance to the theme and scientific sessions of the conference.

STUDENT FORUM

POSTER SESSION

This session is particularly introduced to encourage more number of student participation at international conferences, however it is not restricted only to students since it is also available for the participants with language barrier. There are specific guidelines to be followed to prepare the poster. Poster topic should be selected only from relevant scientific sessions with in-depth technical details.

YOUNG INVESTIGATORS FORUM

An exclusive opportunity for students and young investigators to present their research work through a formal oral presentation. Young Investigators Forum provides a global platform for young researchers and scholars to showcase their valuable contribution to the scientific world and to get acknowledged by the global scientific community of experts. It is an excellent opportunity to recognize young scientific assets with promising research ideas. These oral presentations are of shorter time duration with 10-15 minutes of informative and precise presentations in relevant scientific sessions.

REGISTRATIONS

**SPEAKER
REGISTRATION**

COMBO A

(Registration + 2 night's accommodation)

COMBO B

(Registration + 3 night's accommodation)

DELEGATE REGISTRATION

EDUCATIONAL WORKSHOPS/ RESEARCH WORKSHOPS/CORPORATE WORKSHOPS/MINI- SYMPOSIA

With an aim of transferring knowledge among the participants, workshops are introduced as a part of international conferences. These interactive and occasionally practical sessions gives an opportunity for participants to engage in detail discussion. Workshops are mostly scheduled for 60 to 90-minutes. It may range from learning about a specific topic relevant to international education, products and research which sometimes involves practical demonstration. It helps in enhancing skills, knowledge and understanding of the research field in depth through interactive discussions.

HIGHLIGHTS OF THE DAY SESSIONS

“Highlights of the Day Sessions” is introduced to discuss and focus a ray upon previous day ORAL ABSTRACT presentations by experts to summarise the key findings. It helps in getting better insights into the various dimensions of the topic.

EDUCATIONAL SESSIONS/ TRAINING PROGRAMS

Educational Sessions or training programs are specifically designed for a better understanding of the latest findings and technologies. These are generally 45-minute sessions that gives an exposure to the multidisciplinary field, that provides in-depth learning experiences and address educational needs.

MEET THE PROFESSOR @ NETWORKING SESSIONS

This session involves open discussion between the experts and session attendees, it gives enough time for getting answers to specific questions and doubts. It is an opportunity for attendees to increase their professional networking, sometimes also leads to an excellent collaboration opportunity.

SCIENTIFIC TRACKS/ SESSIONS

Neurology | Neurosurgery | Neuroscience | Neuropsychiatry | Pain Disorder and Management | Central Nervous System | Child Neurology | Neuro-Oncology and Brain Tumors | Neurophysiology | Neuroimmunology | Neuropathology | Neuroimaging | Neurodegenerative disease and Neurodegeneration | Neurological Disorders | Sleep Disorder | Stroke | Movement Disorders | Parkinson's disease | Epilepsy | Multiple Sclerosis | Alzheimer's Disease and Dementia | Neuromuscular Disease | Case studies and Clinical trials | Novel Treatment Strategies
